Mint 32 Dentistry is a warm and relaxing spa for your smile.

A special place where everything is about giving you a beautiful and healthy smile for a lifetime. A place where cutting-edge technology is used for your comfort and the great results you've only dreamed about.

Beauty, comfort and a whole-health approach all converge at Mint 32.

Dr. Darrell Morton travels all over the country for the latest training every year to give you the best available and most comfortable care. He is a skilled dentist with an artistic eye who focuses on achieving your overall health, wellness and satisfaction.

Dr. Morton has a Doctorate of Dental Medicine from Georgia Regents University, is a Fellow of the Academy of General Dentistry and is a sustaining member of the American Academy of Cosmetic Dentistry, the American Academy of Implant Dentistry and the American Academy of Facial Esthetics.

Many patients who are unhappy with their past cosmetic dental procedures come to Dr. Morton for the results they really wanted.

His patients include Broadway stars, professional athletes, other dentists, physicians, musicians and international executives. But, most of his patients are people just like you.

Patients come from all over metro Atlanta and around the world for treatment because of the quality of care they receive and the trust they have in Dr. Morton.

Dr. Morton's philosophy is "the mouth is the gateway to the rest of your body."

His philosophy has evolved through the influence of many great educators and mentors as well as through the latest research and training available to give you the best possible care. Mint 32 provides comprehensive screening, diagnostic and dental care services. The latest innovations in cosmetic dentistry enable you to achieve a more youthful, healthy appearance. Dr. Morton's ultimate goal: a beautiful you, inside and out.

Overall, we want you to be healthy with the smile you deserve.

A healthy mouth helps you live longer with less disease. That's why Dr. Morton's focus is educational. During examinations, he routinely discusses his findings while referring to photos and X-rays on a big screen so the patient can visualize what's being discussed. Patients appreciate being included in the process of understanding their health and empowered to make choices important to them.
